ABSTRACT

1. Natural disasters are a natural phenomenon that occurs directly or indirectly harasses human interest. In this case, natural disasters cause damage to the human good material, non-material and even the soul. Floods are a natural phenomenon that generally always occurs during the rainy season.

2. Natural disasters that occur in some areas of Indonesia are often instantaneous and difficult to predict when it will occur, causing a lot of problems in handling. Of the cases of natural disasters requires a perception of the possible threat of a natural disaster or a threat of natural disasters so that there is an effort to cope with disasters in a coordinated manner covering prevention, preparedness, response and recovery for all components of the nation fit the role, functions and duties governed by laws and regulations so as to minimize casualties caused by the disaster.

3. Use the power of the Army in to help cope with natural disasters, refugee and humanitarian assistance aimed at preventing the development of losses, both lives and property of the people and help people overcome difficulties in order to avoid consequences that threaten the country's sovereignty and the safety of the nation.

4. This paper describes about the role and challenges of Indonesian Army (TNI AD) in conjunction with civil authorities and another organization in natural disaster relief operation. It also determines the condition of optimization Civil Military Cooperation in order to accomplish the task. Through this case, which concerning to the role of TNI AD, the researcher explores the indicators to improve the Civil Military Cooperation in order to give maximum effort for the people. The best way in using military to cope with disaster that occurs in Indonesia can be established by knowing the role, indicator and challenges in frame of Civil-Military Cooperation.
